

Day 4 Functional Components

For Day 4, the task was to build dynamic and responsive front-end components. This included creating a product listing, individual product details, a shopping cart, user profiles, an admin dashboard, and any additional functionality we wanted to implement. I completed all of these and also integrated authentication and authorization.

- **Product Listing Page:** Showcases dynamic data with category.
- **Individual Product Detail Pages:** Implements accurate routing and rendering, along with related product suggestions.
- **Enhanced Shopping Experience:** Features seamless cart management, and a responsive product grid layout.
- **User Profile:** Displays real order data and detailed user information.
- **Admin Dashboard Updates:** Includes real-time statistics, product management, and user role management.

Classic Black Long Sleeve Button-Down Shirt

This sleek black button-down shirt is the epitome of style and versatility. Designed with a tailored fit, it provides a sharp, refined look that's perfect for both professional and casual settings. The long sleeves and crisp collar offer a classic silhouette, while the lightweight fabric ensures comfort throughout the day. Whether worn at the office, for a dinner out, or dressed down with jeans, this black shirt adds a polished touch to any outfit. A must-have wardrobe staple for those who appreciate clean lines and timeless style.
